No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1990 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 39

Number 1, January 1990

FRANÇOIS L. GUILLOT, KENNETH L. AUDUS, AND THOMAS J. RAUB. Fluid-Phase Endocytosis by Primary Cultures of Bovine Brain Microvessel Endothelial Cell Monolayers	1
MALINDA E. C. FITZGERALD AND RUTH B. CALDWELL. The Retinal Microvasculature of Spontaneously Diabetic BB Rats: Structure and Luminal Surface Properties	15
GITTE MOOS KNUDSEN, KAREN D. PETTIGREW, OLAF B. PAULSON, MARIANNE M. HERTZ, AND CLIFFORD S. PATLAK. Kinetic Analysis of Blood-Brain Barrier Transport of D-Glucose in Man: Quantitative Evaluation in the Presence of Tracer Backflux and Capillary Heterogeneity	28
NOBORU WATANABE, YASUAKI KAWAI, AND TOSHIO OHHASHI. Demonstration of Both β_1 - and β_2 -Adrenoceptors Mediating Negative Chronotropic Effects on Spontaneous Activity in Isolated Bovine Mesenteric Lymphatics	50
ROGER A. BUCHANAN AND ROGER C. WAGNER. Associations between Pericytes and Capillary Endothelium in the Eel Rete Mirabile	60
RAKESH K. JAIN, RICHARD J. STOCK, SRIKANTH R. CHARY, AND MICHAEL RUETER. Convection and Diffusion Measurements Using Fluorescence Recovery after Photobleaching and Video Image Analysis: <i>In Vitro</i> Calibration and Assessment	77
HIROSHI IZUMI, SHIZUKO KURIWADA, KEISHIRO KARITA, TAKASHI SASANO, AND DAISUKE SANJO. The Nervous Control of Gingival Blood Flow in Cats	94
TECHNICAL REPORT	
PETER M. DODEK, DIANE K. MINSHALI, JOHN E. EDWARDS, JR., AND RICHARD M. EFFROS. A New Simulation of the Interaction between Neutrophils and Pulmonary Endothelial Cells	105
BRIEF COMMUNICATIONS	
ERIC VICAUT AND OLIVIER STUCKER. An Intact Cremaster Muscle Preparation for Studying the Microcirculation by <i>in Vivo</i> Microscopy	120
SUBRATA CHAKRABARTI AND ANDERS A. F. SIMA. The Presence of Anionic Sites in Basement Membranes of Cerebral Capillaries	123

Number 2, March 1990

DAVID J. LEFER, COLLEEN D. LYNCH, KATHLEEN C. LAPINSKI, AND PHILLIP M. HUTCHINS. Enhanced Vasomotion of Cerebral Arterioles in Spontaneously Hypertensive Rats	129
ROCHELLE MINEAU-HANSCHKE, MARC E. WILES, NICOLE MOREL, HERBERT B. HECHTMAN, AND DAVID SHEPRO. Modulation of Cultured Pulmonary Microvessel and Arterial Endothelial Cell Barrier Structure and Function by Serotonin	140

KYOJI OKADA. Reversible Changes of Skeletal Muscular Capillaries after Application of a Tourniquet	156
AKIRA KAMIYA, JOJI ANDO, MASAHIRO SHIBATA, AND HIROSHI WAKAYAMA. The Efficiency of the Vascular-Tissue System for Oxygen Transport in the Skeletal Muscles	169
FU WEN RONG AND RUSSELL T. CARR. Dye Studies on Flow through Branching Tubes	186
PRATAP K. NAIR, NANCY S. HUANG, J. DAVID HELLUMS, AND JOHN S. OLSON. A Simple Model for Prediction of Oxygen Transport Rates by Flowing Blood in Large Capillaries	203
OLIVIER BONGARD AND BENGT FAGRELL. Variations in Laser Doppler Flux and Flow Motion Patterns in the Dorsal Skin of the Human Foot ...	212
KAREL TYML, ODILE MATHIEU-COSTELLO, AND CLAIRE H. BUDREAU. Microvascular Response to Ischemia, and Tissue Structure, in Normal and Atrophied Skeletal Muscle	223
BRIEF COMMUNICATIONS	
P. GAEHTGENS AND A. R. PRIES. Asymmetric Cell Flow in Narrow Tubes: Experimental Analysis of Cellular Interactions.....	240
I. P. TORRES FILHO. Venular Vasomotion in the Bat Wing	246
ANNOUNCEMENTS	250

Number 3, May 1990

D. G. TAYLOR, J. L. BERT, AND B. D. BOWEN. A Mathematical Model of Interstitial Transport. I. Theory	253
D. G. TAYLOR, J. L. BERT, AND B. D. BOWEN. A Mathematical Model of Interstitial Transport. II. Microvascular Exchange in Mesentery	279
D. R. ADAMS AND W. P. IRELAND. Structure and Organization of the Subepithelial Microvasculature in the Canine Nasal Mucosa.....	307
J. RAE ELK AND GLEN A. LAINE. Pressure within the Thoracic Duct Modulates Lymph Composition	315
G. PELOSI, G. SAVIOZZI, M. G. TRIVELLA, AND A. L'ABBATE. Transmural Redistribution of Coronary Resistance during Embolization: A Clue to Intramyocardial Small Artery Architecture	322
KLAS NORRBY, ANDERS JAKOBSSON, AND JAN SÖRBO. Quantitative Angiogenesis in Spreads of Intact Rat Mesenteric Windows	341
MICHAEL A. HILL, BRANDON E. SIMPSON, AND GERALD A. MEININGER. Altered Cremaster Muscle Hemodynamics due to Disruption of the Deferential Feed Vessels	349
PATRICK J. KELLY AND JAMES T. BRONK. Venous Pressure and Bone Formation	364

K. KVERNEBO, L. E. STAXRUD, AND E. G. SALERUD. Assessment of Human Muscle Blood Perfusion with Single-Fiber Laser Doppler Flowmetry 376

BRIEF COMMUNICATIONS

MARCOS INTAGLIETTA AND WILLIAM R. TOMPKINS. Simplified Micropres-
sure Measurements via Bridge Current Feedback 386

HARVEY N. MAYROVITZ, JOHN MOORE, AND ELIZABETH SORRENTINO. A
Model of Regional Microvascular Ischemia in Intact Skin 390

AUTHOR INDEX FOR VOLUME 39 395

NOTICE

The Subject Index for Volume 39 will appear in the November 1990 issue as part of a cumulative index for the year 1990.

Kahle/Austin Foundation

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215.** MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors**, and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for photographic reproduction. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5 × 11 inches, with coordinates properly labeled; grid lines that are to show in the photoreproduction should be inked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unmounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5 × 8 in. (127 × 203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Illustrations in color can be accepted only if the authors defray the cost.

Footnotes. These should be designated in the text by superscript numbers and typed on a separate sheet; in the tables by superscript letters and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The *Style Manual*, 1986, of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

- GRAYSON, J., AND LEVESON, M. (1985). Functional and morphological changes in the microcirculation of the dog following acute coronary artery ligation. *Microvasc. Res.* **29**, 161-175.
- ALLEN, J. C., AND BUKOSKI, R. D. (1982). Current status of vascular smooth muscle subcellular calcium regulation. In "Vascular Smooth Muscle: Metabolic, Ionic, and Contractile Mechanisms" (M. F. Crass III and C. D. Barnes, Eds.), pp. 99-134. Academic Press, New York.

Abbreviations of journal names should follow the style of *Chemical Abstracts Service Source Index*, 1985. Unpublished observations and personal communications should be cited in the *text* as such.

Proofs. Proofs will be sent to the author with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints of each article (without covers) will be supplied free of charge. Additional reprints may be ordered. A reprint form will accompany the proofs.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.

Knowledge—To Keep You Informed and Effective

HYPERLIPIDAEMIA AND ATHEROSCLEROSIS

edited by

P.E. Suckling and P.H.E. Groot

Written by leading experts, this volume provides an excellent overview of many of the approaches that are needed to increase our understanding of atherosclerosis and to identify new ways of preventing and treating this modern scourge.

CONTENTS: Introduction. A Quantitative Approach to Low Density Lipoprotein Metabolism in Man and Various Experimental Animals. Recent Advances in the Structure and Biosynthesis of Apolipoproteins B-100 and B-48. Regulation of the APOB100 Cascade. Apolipoprotein B: A Novel Mechanism for Deriving Two Proteins from One Gene. Cholesterol Absorption Regulates Cholesterol Metabolism and Within-Population Variation of Serum Cholesterol. Therapeutic Mobilization of Tissue Cholesterol. Lipids, Coagulability and Schaemic Heart Disease. Macrophages and Ceroid in Atherosclerosis. Low Density Lipoprotein Interaction with Arterial Proteoglycans—Effects on Lipoprotein Interaction with Arterial Cells. Proliferation of Vascular Smooth Muscle Cells *in Vivo*. Molecular Mechanism of Action of Newer Thrombolytic Agents. Long Term Follow Up after Coronary Thrombolysis—The Edinburgh Experience.

1988, 228 pages, \$65.00
ISBN: 0-12-675645-7

CALCIUM ANTAGONISTS **Winfred Nayler**

This is a comprehensive and balanced account of the chemistry and pharmacology of calcium antagonists, how they modulate calcium transport and their use as therapeutic agents for the management of a wide variety of cardiovascular and noncardiovascular disorders.

CONTENTS: Introduction: Some Historical Considerations. Ion Conducting Channels: Sodium and Potassium. Ion Conducting Channels: Calcium. Chemistry of the Inorganic and Organic Calcium Antagonists. The Identification and Mode of Action of the Calcium Antagonists. Calcium Antagonist Binding Sites: Their Density, Structure, and Size. Classification of the Calcium Antagonists. Tissue Selectivity. Synthetically Calcium Agonists. Naturally Occurring Calcium Antagonists and Agonists. Calcium Antagonists and Myocardial Ischaemia. Calcium Antagonists and Angina. Calcium Antagonists and Arrhythmias. Calcium Antagonists and the Management of Cerebral Ischaemia. Calcium Antagonists and the Treatment of Hypertension. Calcium Antagonists and Atherosclerosis. Calcium Antagonists and the Management of Congestive Heart Fail-

ure and Cardiomyopathies. Drug Interactions with the Calcium Antagonists. Side-Effects, Tachyphylaxis, Withdrawal Symptoms, and Contraindications. What Does the Future Hold?

1988, 360 pages, \$55.00
ISBN: 0-12-514645-0

CALCIUM IN ESSENTIAL HYPERTENSION

edited by

Kyuzo Aoki and Edward D. Frohlich

This book is comprised of critical overviews by investigators primarily concerned with the role of arterial muscle in hypertension.

CONTENTS (Subject Headings): Essential Hypertension: An Introduction. Calcium Ion in Arterial Muscle. Calcium Channels, Agonists, and Antagonists in Arterial Muscle. Altered Contraction in Arterial Muscle from Spontaneously Hypertensive Rats. Calcium Antagonists in Treatment of Hypertension. Etiology of Essential Hypertension.

1988, 675 pages, \$150.00
ISBN: 0-12-058845-5
